

# BUCKEYE TOOLS

This line offers you exceptional talking points to your customers, and is a profitable one for you to handle, it will sell itself if shown.

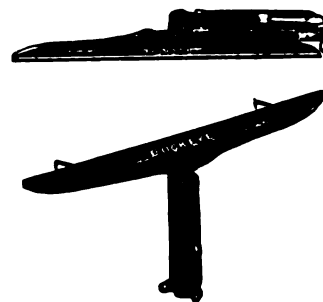

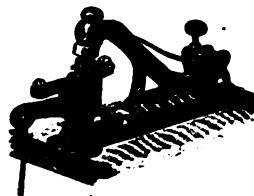

## BETTER PLANES

mean better business for you. If you want to gather all the plane business in your town and completely outstrip your competitors, examine the new BUCKEYE PLANE closely.

Buckeye Planes are made in three sizes: Smooth, Jack and Fore. They are the easiest and quickest adjusted Planes, and absolutely will not clog, chatter or tear out, even when planed against the grain in the most difficult wood. Workmanship and material are the best possible, and are fully warranted.

This Saw Set is so constructed that a uniform blow is given to each tooth, no guess work as to the amount of set to be given, no danger of breaking the points of the most highly tempered saw; being operated by the foot there is no strain on the wrist, and leaves both hands free to guide the saw. It is light, and takes up very little space in the tool chest.

The Buckeye Folding Saw Vise is the most convenient on the market; folds up in a neat, compact form, and takes very little space in the tool chest. Only one shift required in filing a saw and position does not have to be changed to joint a saw. Can be fastened anywhere instantly by means of folding hooks.

We also manufacture a full line of other Saw Vises, Chain Drills, Hollow Augers, Emery Wheel Dressers, Tool Handles, Cabinet Scrapers, Plane Gauges, etc.
